

# 2013 INMR WORLD CONGRESS

**Insulators Arresters Bushings Cable Accessories**

**Westin Bayshore Hotel & Conference Center, Vancouver, Canada: September 8-11, 2013**

## No Ordinary Call for Papers

In September of next year, the 2013 INMR World Congress will be held in Vancouver, British Columbia, Canada. This event will include technical and commercial coverage of Arresters, Insulators, and Bushings. It will no doubt be an energizing and thought provoking event for all attendees.

As chair of the Arrester Section of the Congress, I am especially eager to have well thought out, highly informative presentations about surge arrester applications. Therefore this call for papers is a bit different than you would get in any other organization.

### Topics

The paper topics must of course be centered around surge protection applications.

The sub topics at the moment are quite open. Below is a list of potential topics but my no means limited to these.

- Transmission Line Arrester Applications
- Arrester Monitoring Advances
- Underground Line Protection
- FACTS Protectors
- Arrester Standards
- Substation Protection
- Arrester Modeling and Transient Studies
- How to Improve Protection at Lower Costs
- How to Improve Surge Protection in General
- Innovative Protection Schemes
- EHV and UHV Applications
- Issues to resolve above 800kV
- Energy Tests
- Field Testing of Arresters
- Advances in Arrester Technology
- Advances in Surge Protection Understanding

What makes this no ordinary call for papers is the fact that we will assist you in your paper preparation. We will offer pointers, we will assist in English translation, we will offer ideas on how to improve, we will guide you as much as you need. Not only do we assist in the writing, INMR offers financial assistance with room accommodations and congress registration for approved authors. As part of the World Congress Event there will be a time set aside for a tutorial on surge protection that authors will be

invited to. We are looking for authors and papers from the new engineer to the long term experienced engineer, all are welcome.

## **The Call**

We are looking for authors to write papers regarding surge protection successes and challenges. The length of the paper is not critical, but keep it reasonable. The paper will be due in the Summer of 2013, and the mandatory presentation due in August 2013. Presentation at the World Congress is mandatory.

Contact me immediately if you are interested in participating in this event. I'm looking forward to working with you on a paper that matters.
